

Short Course on Project Management in Public Health 31 July to 3 August 2017 (with partial support from Indian Council of Medical Research)

Many projects and schemes are being implemented by government and non-government organizations for improving public health. Proper planning, implementation, monitoring and evaluation are critical for the success of such initiatives. The short course on Project Management in Public Health is geared to impart essential skill sets and hands-on experiences required to plan, implement and monitor public health projects and schemes.

Who stands to gain from the course?

1. Nodal officers, program managers working at state and district level
2. Person responsible for program monitoring and evaluation
