Leaders for Tomorrow”*

Master of Public Health

About Public Health

The transition of diseases from communicable to non-communicable has been experienced in most parts of the world. Age-old problems of mother and child deaths, malnutrition, malaria and TB, despite noteworthy improvements, are still posing a challenge in many parts of the world, including in India. Simultaneously, lifestyle diseases like hypertension, diabetes, psychosis, and accidents are rapidly increasing, both in urban and rural areas. Added to this dual burden, are possible epidemics of emerging (Swine flu, Bird flu) and re-emerging infections (Plague, Cholera), creating enormous challenges to the health system, as we have seen through the COVID-19 pandemic. It has become evident that these challenges cannot be managed through curative services alone. Strengthening health systems by bringing together expertise from a range of disciplines - medicine, social sciences, management, engineering, information technology - is the need of the hour. Efficient management of health programmes and systems by specially qualified public health managers is the key to address these challenges. The recent pandemic has reinforced the need for well-trained public health professionals to strengthen public health systems.

Unfortunately, India has a dearth of manpower trained in public health. IIPHG, the first public health university of India, aims to train public health professionals from all over the world who would be relevant to the unique public health needs of India, and of other countries that face similar challenges.

Master of Public Health (MPH) Programme in IIPHG

The MPH programme offered by IIPHG is a two-year, full time programme aimed at bridging the gap in public health manpower. It has been designed to help participants acquire skills to examine and respond to current and future public health challenges. The programme has a multi-disciplinary curriculum - public health management, epidemiology, biostatistics, demography, social behavioural sciences in health, health promotion, health economics, health financing health policy. The programme is delivered using a variety of teaching/learning techniques, e.g; lectures, case discussions, practical exercises, lab work, field visits, seminars, journal clubs, group discussions, assignments, internships, and dissertation.

Faculty

IIPHG has 18 full-time faculty members with medical, public health, pharmaceuticals, management, finance and social science backgrounds. All of them have advanced qualifications from reputed Indian and/or foreign universities. Additionally, a number of visiting/adjunct faculty from India abroad contribute to IIPHG's teaching programmes. Public health experts from governmental non-governmental organisations are also invited to deliver sessions at IIPHG.

Career Prospects after MPH

The MPH degree opens up avenues to a career in public health, so as to enable graduates to contribute to the improvement of health and welfare of populations. Potential employers include multilateral and bilateral organisations like World Health Organisation, UNICEF, various state/central government departments, national and international non-governmental organisations (NGOs), industry-supported (CSR) foundations, academic/research institutions, hospitals, health insurance companies, and allied health organisations. One can also opt for higher studies in public health in India or abroad. The placement cell at IIPHG facilitates students to find suitable placements.

Eligibility

The course is open to candidates with a bachelor's degree in any discipline from a recognised university in India or abroad, with at least 50% marks. Public health being a multidisciplinary area, students from diverse academic backgrounds e.g; medicine, dentistry, physiotherapy, AYUSH, nursing, other paramedical and veterinary sciences, management, natural sciences (including biology), social sciences and social work, engineering, law, commerce or accounting, communication, etc. can apply. Relevant work experience in health and development sector will be an advantage but is not mandatory.

Master of Public Health

Admission Process

Selection of applicants will be based on educational qualification, marks obtained in board/university exams, work experience, and performance in personal interview, essay writing, and group discussion.

Programme Fees

- Practical trainings in PH internship & dissertation
- Field visits to Public Health Facilities, NGO & Health systems

Professional And Personal Development

- Debate
- Professional Development Workshop
- Public Health Students Conclave
- Cultural Fest, Garba night
- Sports Week
- Cycling Excursion
- Photography Contest

About IIPHG

IIPHG was set up in 2008 by the Public Health Foundation of India (PHFI) and the Government of Gujarat as a joint initiative. In 2016, it moved to its new lush, green, 50 acres campus on the banks of river Sabarmati provided by the Govt. of Gujarat in Gandhinagar.

IIPHG is a pioneer institute in public health education, training, research and advocacy. The institute has the distinction of being awarded recognition as the first public health university in India (under IIPHG Act-2015 of Gujarat State). IIPHG has a number of research and implementation collaborations and MoUs with organisations and institutes of repute in India and abroad. IIPHG has collaborated with various Government partners like ICMR, DST, DBT, IMD, Govt. of Gujarat, and Govt. of Maharashtra. IIPHG has also worked with WHO, UNICEF, CARE Bihar and has international collaborations with University of Bonn, Germany, University of Canberra, Australia and NRDC, USA. IIPHG has a molecular biology laboratory which was established with support from DST. IIPHG has a rich research portfolio with more than 300 research papers published till now. A Student's Innovations Center has been recently
