IIPHG & Shalby Academy Announce **Advanced Post Graduate Management Program in Healthcare and Hospital Leadership**

Batch starts in October 2023

Course Background

After the COVID-19 pandemic, the healthcare sector needs specific skills among the professionals to lead and manage a healthcare organization. The advanced post graduate program for healthcare and hospital leaders aim to develop the necessary skills among the healthcare/hospital mid to senior level managers for preparing them to internal and external challenges. The program aims to equip the participants with dynamism to handle difficult situations. This online course will provide opportunity to engage with the other participants from different domains. The team of expert faculties will allow the exchange of ideas and experiences of managing various challenges in the management of any healthcare organization.

In today's changing times, healthcare industry is both a business and an essential service industry. The healthcare industry is expected to cross \$50 billion mark by 2025. Bureau of Labor indicates that the man power requirement in healthcare will grow at a rate twice as much as non-healthcare sector. The role of leaders in healthcare industry can not be trivialized. The healthcare leaders have to make tough decisions during crisis and even during normal times. This course gains its impetus from the important role of health care and hospital leaders have in improving the patient pathways and outcomes. The program addresses the organizational, budgetary, staffing, political, and managerial issues that leaders in hospitals face by providing relevant, practical, and real-world guidance.
